

4. Hunting scenes (ca. 1935)

Painter: Hailu (?), canvas, 118 × 78 cm

Völkerkundemuseum der Universität Zürich

Inv.-No. 14208

This picture shows different episodes of a traditional hunt. While some of the men are armed with the usual weapons such as spears, swords and shields, the majority are already in possession of European rifles. Gold earrings identify some of the hunters as particularly successful marksmen.
